

Björn Kleinhenz, biography

Björn Kleinhenz is a swedish independent musician.

He was born in southern Germany in the summer of 1981 but moved at an early age to Sweden where he has lived since. After growing up playing punk and hardcore in the small southern town of Sölvesborg he set off as a solo artist around his 20th year and has since then been a highly productive record artist and performer. Since his debut in 2003 Björn has put out close to 30 different releases and played over 300 shows throughout Europe.

Early in 2012 Björn collaborated with photographer Simon Rydén. The project resulted in a photographic book and a very stripped down album called *The Fall of Discontent*, later to be released in a luxury vinyl version in 100 copies on JellyFant Records.

When Björn does not make music he lives in a small red house in the woods on the swedish westcoast working with cultural projects for children. He keeps warm with birch wood and books by Thomas Bernhard, Colm Toibin and Alfred Jarry.
